

kiize.github.io

This is my personal page built with [Quarto](#).

In [About](#) you can find more informations about me, in [Projects](#) you can discover what I am working on and in [Gists](#) some linux commands I find useful.

Curious about what am I working on? This is a summary of my projects.

Entanglement phase transitions

In my Master's thesis, I studied how local quantum measurements affect entanglement growth in one-dimensional fermionic systems.

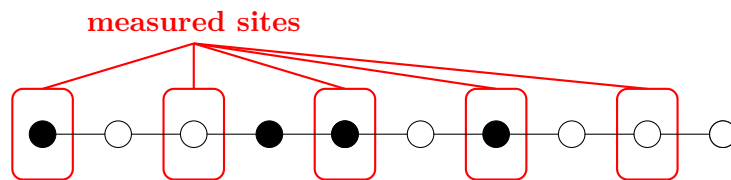

Figure 1: One-dimensional fermionic chain with local measurements applied on a finite fraction of sites.
